

## 兔抗 TSHB 多克隆抗体

- 中文名称: 兔抗 TSHB 多克隆抗体
- 英文名称: Anti-TSHB rabbit polyclonal antibody
- 别名: thyroid stimulating hormone beta; TSH-B; TSH-BETA
- 储存: 冷冻 (-20℃)
- 抗原: TSHB
- 宿主: Rabbit
- 反应种属: Human, Mouse, Rat
- 相关类别: 一抗
- 标记物: Unconjugate
- 克隆类型: rabbit polyclonal

### 技术规格

**Background:**

The four human glycoprotein hormones chorionic gonadotropin (CG), luteinizing hormone (LH), follicle stimulating hormone (FSH), and thyroid stimulating hormone (TSH) are dimers consisting of alpha and beta subunits that are associated noncovalently. The alpha subunits of these hormones are identical, however, their beta chains are unique and confer biological specificity. Thyroid stimulating hormone functions in the control of thyroid structure and metabolism. The protein encoded by this gene is the beta subunit of thyroid stimulating hormone. Mutations in this gene are associated with congenital central and secondary hypothyroidism and Hashimoto's thyroiditis. Alternative splicing of this gene results in multiple transcript variants.

<b>Applications:</b>	ELISA, IHC
<b>Name of antibody:</b>	TSHB
<b>Immunogen:</b>	Synthetic peptide of human TSHB
<b>Full name:</b>	thyroid stimulating hormone beta
<b>Synonyms:</b>	TSH-B; TSH-BETA
<b>SwissProt:</b>	P01222
<b>ELISA Recommended dilution:</b>	5000-10000
<b>IHC positive control:</b>	Human tonsil
<b>IHC Recommend dilution:</b>	40-200
