

兔抗 UBAC2 多克隆抗体

中文名称: 兔抗 UBAC2 多克隆抗体

英文名称: Anti-UBAC2 rabbit polyclonal antibody

别名: PHGDHL1

储存: 冷冻 (-20℃)

宿主: Rabbit

抗原: UBAC2

反应种属: Human, Mouse

标记物: Unconjugate

相关类别: 一抗

克隆类型: rabbit polyclonal

技术规格

Background:

UBAC2 (ubiquitin-associated domain-containing protein 2), also known as PHGDHL1 (phosphoglycerate dehydrogenase-like protein 1), is a 344 amino acid multi-pass membrane protein that contains one UBA domain and is expressed as multiple alternatively spliced isoforms. The gene encoding UBAC2 maps to human chromosome 13, which houses over 400 genes, such as BRCA2 and RB1, and comprises nearly 4% of the human genome. As with most chromosomes, polysomy of part or all of chromosome 13 is deleterious to development and decreases the odds of survival. Trisomy 13, also known as Patau syndrome, is deadly and the few who survive past one year suffer from permanent

	neurologic defects, difficulty eating and vulnerability to serious respiratory infections. Restricts trafficking of FAF2 from the endoplasmic reticulum to lipid droplets.
Applications:	ELISA, IHC
Name of antibody:	UBAC2
Immunogen:	Fusion protein of human UBAC2
Full name:	UBA domain containing 2
Synonyms:	PHGDHL1
SwissProt:	Q8NBM4
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human cervical cancer
IHC Recommend dilution:	25-100
