

兔抗 HTR2B 多克隆抗体

中文名称：兔抗 HTR2B 多克隆抗体

英文名称：Anti-HTR2B rabbit polyclonal antibody

别名：5-HT2B, 5-HT(2B)

储存：冷冻（-20℃）

抗原：HTR2B

宿主：Rabbit

相关类别：一抗

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	This gene encodes one of the several different receptors for 5-hydroxytryptamine (serotonin) that belongs to the G-protein coupled receptor 1 family. Serotonin is a biogenic hormone that functions as a neurotransmitter, a hormone, and a mitogen. Serotonin receptors mediate many of the central and peripheral physiologic functions of serotonin, including regulation of cardiovascular functions and impulsive behavior. Population and family-based analyses of a minor allele (glutamine-to-stop substitution, designated Q20*) which blocks expression of this protein, and knockout studies in mice, suggest a role for this gene in impulsivity. However, other factors, such as elevated testosterone levels, may also be involved.
--------------------	--

Applications:	ELISA, IHC
Name of antibody:	HTR2B
Immunogen:	Fusion protein of human HTR2B
Full name:	5-hydroxytryptamine receptor 2B
Synonyms:	5-HT2B, 5-HT(2B)
SwissProt:	P41595
IHC positive control:	Human gastric cancer and human liver cancer
IHC Recommend dilution:	100-300
